Abstract

Abstract to be written here. The abstract should not be too long and should provide the reader with a good understanding what you are writing about. Academic papers are not like novels where you keep the reader in suspense. To be effective in getting others to read your paper, be as open and concise about your findings here as possible. Ideally, upon reading your abstract, the reader should feel he / she must read your paper in entirety.

Table of Contents

1	Introduction	3
2	Methodology	3
2.1	Subsection	3
2.2	Math section	3
3	Results	3
3.1	Huxtable	3
References		4
Appendix		4
Appendix A	4
Appendix B	4

Contributions:

The authors would like to thank no institution for money donated to this project. Thank you sincerely.

1. Introduction

References are to be made as follows: [Fama & French \(1997: 33\)](#) and [Grinold & Kahn \(2000\)](#) Such authors could also be referenced in brackets ([Grinold & Kahn, 2000](#)) and together [Grinold & Kahn \(2000\)](#). Source the reference code f # Data {-}

2. Methodology

2.1. Subsection

Ideally do not overuse subsections. It equates to bad writing.⁴

2.2. Math section

3. Results

3.1. Huxtable

⁴This is an example of a footnote by the way. Something that should also not be overused.
