Abstract

Cool Abstract to be written here. The abstract should not be too long and should provide the reader with a good understanding what you are writing about. Academic papers are not like novels where you keep the reader in suspense. To be effective in getting others to read your paper, be as open and concise about your findings here as possible. Ideally, upon reading your abstract, the reader should feel he / she must read your paper in entirety.

### 28 *3.1. Huxtable*

<sup>4</sup>This is an example of a footnote by the way. Something that should also not be overused.
